For Immediate Release

Angels Grace Hospice celebrates five years of outstanding care on August 1st. By building a reputation for top tier care, Angels Grace Hospice has grown four-fold since its inception in 2011, with 33 full-time and part-time nurses, social workers, chaplains, health aides and over 25 volunteers. The word is out – Angels Grace Hospice offers the most compassionate and knowledgeable hospice care around. It is no longer a start-up, but a vital contributor to the mission of excellent end of life care.

“Angels Grace Hospice was founded to fill a need in the hospice community,” said Marilyn Colley, Executive Director of Angels Grace Hospice “There was a need for one-on-one, excellent patient-centered care. At the same time, hospice workers, myself included, needed to provide hospice care the “old fashioned way.” By that, I mean care that is patient-centered, where employees are highly valued and case-loads are manageable. Our staff has the time to spend with patients and families and productivity is not the primary focus. Leadership is built on mentoring and encouraging our staff.”

“We live by the credo – To comfort always – that is our work. When you begin the journey with a patient and family, the end-goal is to comfort always. This is our work. At Angels Grace, you expect the best and you receive the best.”
